

BioXmark[®] Liquid Fiducial Marker

MANUFACTURED BY NANOVI

CUSTOMIZABLE IMPLANTATION

The liquid nature of BioXmark enables implantation of multiple markers of varying sizes in the same uninterrupted procedure.

POSITIONAL STABILITY AND VISIBILITY

Following implantation, sticky and soft markers form, adapting to the surrounding tissue* and remaining visible under relevant imaging, including MRI.

PHOTON AND PROTON COMPATIBILITY

BioXmark markers are non-metallic and have low levels of artifacts and low-dose perturbation. These qualities support precise treatment planning and image-guided treatment, including proton therapy.

WORKFLOW BENEFITS

Achieve CT and MRI image acquisitions while ensuring streamlined workflows and low risk of complications, all without specialized equipment.
