# Curvaform™ Head Support

A SMARTER SOLUTION FOR  
POSITIONING KYPHOTIC PATIENTS

The Curvaform Head Support is a specialized solution designed to meet the unique needs of kyphotic patients. Built for comfort, stability, and consistency, Curvaform helps radiotherapy professionals streamline setup and deliver reproducible, high-quality care. Its secure positioning system enhances workflow efficiency and supports better treatment outcomes, even in the most challenging cases.

Compatible with  
Encompass™ devices

Compatible with Type-S™  
devices, including Portrait™,  
Alta™, and TotalRT™  
All in One platforms

# Curvaform™ Head Support

---

## PURPOSE-BUILT CARE

Unlike makeshift methods, Curvaform is purpose-built, ensuring tailored care for patients with spine curvature.

---

## ENHANCED PATIENT COMFORT & REPRODUCIBILITY

Unique design utilizing proven positioning devices helps kyphotic patients lie comfortably, ensuring stability and accuracy during their entire treatment process.

---

## IMPROVED WORKFLOW EFFICIENCY

Reduces the setup time and staff needed for treating kyphotic patients, offering a seamless transition from simulation to treatment.

---

## EXCLUSIVE DESIGN & PROVEN RESULTS

Backed by clinical insights and developed with input from industry experts, Curvaform seamlessly integrates with existing head & neck systems such as Type-S™, Portrait™, and Encompass™.
