

Curvaform™ Head Support

A SMARTER SOLUTION FOR POSITIONING KYPHOTIC PATIENTS

The Curvaform Head Support is a specialized solution designed to meet the unique needs of kyphotic patients. Built for comfort, stability, and consistency, Curvaform helps radiotherapy professionals streamline setup and deliver reproducible, high-quality care. Its secure positioning system enhances workflow efficiency and supports better treatment outcomes, even in the most challenging cases.

PURPOSE-BUILT CARE

Unlike makeshift methods, Curvaform is purpose-built, ensuring tailored care for patients with spine curvature.

ENHANCED PATIENT COMFORT & REPRODUCIBILITY

Unique design utilizing proven positioning devices helps kyphotic patients lie flat comfortably, ensuring stability and accuracy during their entire treatment process.

IMPROVED WORKFLOW EFFICIENCY

Reduces the setup time and staff needed for treating kyphotic patients, offering a seamless transition from simulation to treatment.

EXCLUSIVE DESIGN & PROVEN RESULTS

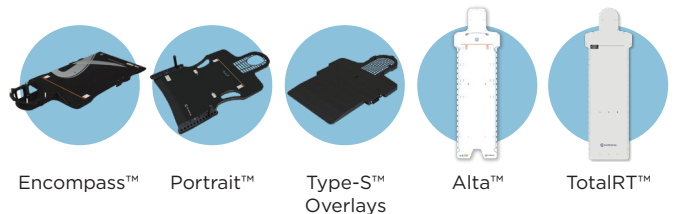

Backed by clinical insights and developed with input from industry experts, Curvaform aligns with the latest standards and seamlessly integrates with existing head & neck systems.
