

Aquaplast PS™ Thermoplastic Nasal Splints & Tie-Down Dressings

CUSTOM PROTECTION AND COMFORT FOR POST-OPERATIVE CARE

Aquaplast PS Nasal Splints provide the protection and support essential for post-rhinoplasty recovery. The thermoplastic material ensures a custom, comfortable fit that stabilizes results while minimizing swelling and bruising. With a discreet, breathable design, patients heal confidently and stay compliant.

CUSTOM FIT & ADAPTABILITY

- Softens in warm water to contour precisely to each patient's anatomy—or over gauze and tape—for a snug, comfortable fit.
- Easily remolded to accommodate swelling or healing changes over time.

EFFICIENCY & PROTECTION

- Easy to mold, apply, and remove, streamlining surgical workflows.
- Durable structure shields against accidental bumps and external pressure.

COMFORT & COMPLIANCE

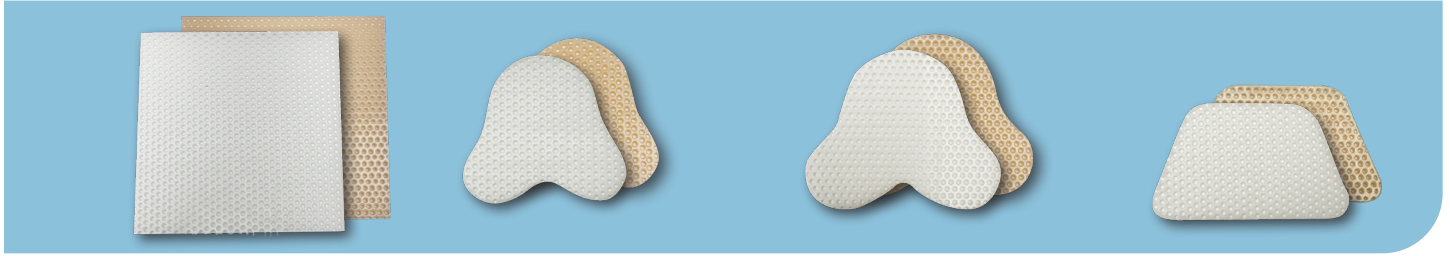

- Lightweight, breathable materials minimize irritation and promote patient comfort.
- Low-profile, discreet design boosts patient confidence and encourages compliance.

OPTIMAL HEALING & AESTHETICS

- Stabilizes nasal structures to reduce swelling, bruising, and unwanted shifts.
- Supports optimal cosmetic outcomes throughout recovery.

Nasal Splint Packs

All splints are non sterile and latex free.

Stents

PS-1678 Ivory Martin Mandibular Stent - 1/16" (1.6 mm), 3 Pack

Tie Down Dressing

Safely protect full-thickness skin grafts during the critical initial healing phase. These rigid, non-occlusive dressings can be precisely contoured for an exact fit and securely sutured in place. They provide uniform pressure over grafts, allow for proper drainage, and help prevent graft displacement and unwanted ridges, supporting optimal healing outcomes.

Accessories

Warmer

A space-saving warmer, perfectly suited for softening Aquaplast PS Thermoplastic Nasal Splints and Tie-Down Dressings.

MTCBPBITEWRM Warmer, 110 volt

Mastisol® Liquid Adhesive

A clear, non-irritating surgical adhesive designed for secure application of Aquaplast PS Thermoplastic Nasal Splints. Mastisol creates a durable, water-resistant barrier between skin and tape to enhance fixation and patient comfort. The formula is latex-free, non-staining, and non-cytotoxic, and can be easily softened and removed with Detachol. Note: Product cannot be shipped by air.

PS-3350 Mastisol Liquid Adhesive Qty 48 Sterile Vials per box

Detachol® Adhesive Remover

A gentle, non-aerosol, non-explosive adhesive remover designed for patient comfort. It features a non-stinging, pleasant-fragrance formula that minimizes irritation and does not irritate skin when used as directed. Free from chloroform, acetone, benzene, and latex. Note: Product cannot be shipped by air.

PS-3450 Detachol Adhesive Remover Qty 48 Sterile Vials per box
